

# Rob Wilmoth

Rob "FasterSkunk" Wilmoth is a driver, builder, and team lead for FasterSkunk Racing based in Louisburg, NC. He (and his team) have a true passion for helping new people get exposed to motorsports of all kinds, however has a special place in his heart for Audi/Volkswagen, and has based his own car around being an R&D platform for the Audi RS3 (8v, 2018). Rob regularly competes in Time Trials with SCCA, and participates as a coach for both Time Trials as well as SCCA's Track Night in America. Rob found Racing for ALS based on a recommendation from Tradd (Like so many others!), and found that after doing some research, ALS does have a presence within his family history. He now spends time and effort as Racing For ALS's Chief Driving Instructor to help make sure that those joining Dave's Race or any other Racing to ALS event have a tremendous, fun, and above all safe experience. In his non-racing time, he enjoys spending time boating with his wife, and has 5 cats that do not enjoy the boating.
